# IMPORTANT

## YOUR PROTECTION IN BUYING A STRINGED MUSICAL INSTRUMENT:

It is fully as important to make a careful selection in securing a musical instrument, as it is to select a competent instructor, to give you the instruction. By demanding the SammO or SammoS brand string musical instruments you are assured of receiving the best instruments that mechanical skill can produce.

The reason for demanding this make of instrument is simple: Every instrument made of these two brands is personally inspected by a musician of national known repute as a critic and judge of stringed instruments.

The instrument is put in tune and tested for tone, accuracy of frettings, nut or saddle adjustment, quality of finish, and watched carefully for the proper seasoning of the material that goes into the instrument, etc.

When you buy the Sammos or Sammo brand of instrument, you buy an instrument that has passed the critical judgment of a man of thirty years experience as an instructor and a musical instrument critic; in other words, putting an instrument in your hands that is ready to play on without further adjustment.
